 2007 Session

FISCAL AND POLICY NOTE

House Bill 977 (Delegate Costa)
 Environmental Matters

Task Force on a Statewide Stormwater Management and Sediment Control Initiative

This bill establishes a Task Force on a Statewide Stormwater Management and Sediment Control Initiative to evaluate and make recommendations to develop a minimum science-based statewide standard that must be followed by local governments. The Maryland Department of the Environment (MDE) must provide staff for the task force. A member of the task force may not receive compensation but is entitled to reimbursement for expenses under the standard State travel regulations. A report with findings and recommendations is due to the Governor and the General Assembly by July 1, 2008.

The bill takes effect July 1, 2007 and terminates July 31, 2008.

Fiscal Summary

State Effect: General fund expenditure increase of \$97,000 in FY 2008 only for MDE to staff the task force. No effect on revenues.

(in dollars)	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
Revenues	\$0	\$0	\$0	\$0	\$0
GF Expenditure	97,000	0	0	0	0
Net Effect	(\$97,000)	\$0	\$0	\$0	\$0

Note:() = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate effect

Local Effect: The bill would not materially affect local operations or finances.

Small Business Effect: None.

Analysis

Current Law: State law requires each county and municipality to adopt ordinances necessary to implement a stormwater management program and to restrict the development of any land unless the landowner has submitted a stormwater management plan consistent with the local ordinance. The county or municipality has the authority to approve or disapprove stormwater management plans.

In general, a person may not develop any land for residential, commercial, industrial, or institutional use without submitting, and getting approval of, a stormwater management plan from the county or municipality that has jurisdiction. The developer must certify that all land development will be done according to the approved plan. A State or federal agency may not undertake any construction activity unless the agency has submitted and obtained approval of a stormwater management plan from MDE.

Criminal, civil, and administrative penalties apply to violations of the State's stormwater management provisions. Every three years, MDE is required to review the stormwater management programs in the counties and municipalities and monitor their implementation. MDE is also required to provide technical assistance, training, research, and coordination services to local governments in the preparation and implementation of their stormwater management programs.

State Expenditures: General fund expenditures could increase by an estimated \$96,964 in fiscal 2008, which reflects the bill's July 1, 2007 effective date. This estimate reflects the cost of one contractual water resources engineer and one contractual natural resources planner to staff the task force. It includes salaries, fringe benefits, one-time start-up costs, and ongoing operating expenses.

Salaries and Fringe Benefits	\$91,944
Operating Expenses	<u>5,020</u>
Total FY 2008 State Expenditures	\$96,964
Contractual Positions	2

Because the task force terminates on July 31, 2008, and because the task force is required to submit a report of its findings and recommendations by July 1, 2008, it is assumed that State expenditures would not be affected beyond fiscal 2008.
